

CENTER SLIDES FOR POWERPOINT

Reading & Math

These Reading and Math Center Slides are made specifically for use with **Powerpoint**

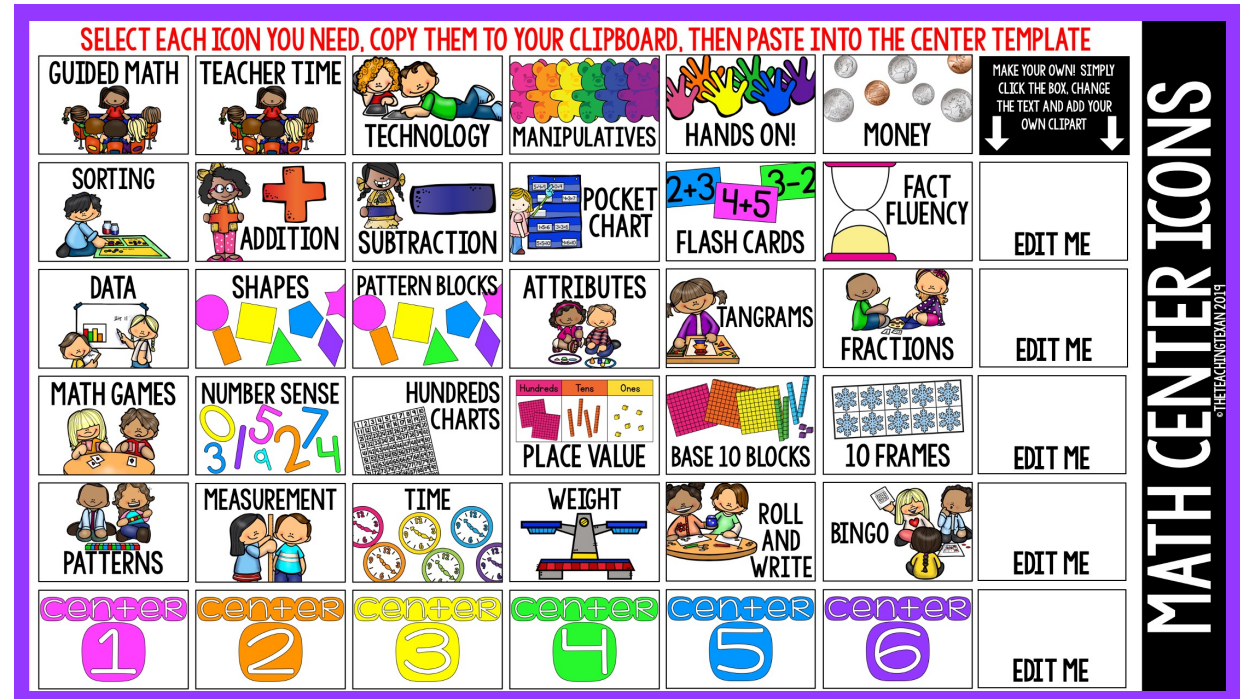

They are an **easy way** to **manage** center time without the stress.

There are also **editable** pieces if there is an icon you are needing that is not on the list.

There are icons for both **math** and **reading** allowing you to create **any rotation** you would like

Why do you need this?

Use these slides as a way to **gain control back** during your center time.

The digital timer is a **great visual** for students to see how much time is left in their rotation as well as where they will be going next.

JESSICA W. ★★★★★

It sounds nuts, but this product is life-changing. I was going crazy trying to organize daily 5 and my math rotations. Everything I tried was cumbersome, difficult to manage on the fly, and tbh, ugly. Then there was the problem of me ALWAYS forgetting to start a timer. While I wish it was easier to switch from one length of time to another, I just ended up creating new more files and naming them according to the duration of rotations. Best \$ll spent on TPT, hands down.

ANGIE P. ★★★★★

This has been a life saver for me! The grids are easy for my first graders to follow and determine which center to use for each rotation. I love the pictures which help my beginning readers. Excellent resource!

JOY H. ★★★★★

I use this every day for rotations. It is a great way to help my students navigate the classroom and understand what they are supposed to be! The center icons are a huge help as well!!

Add some FUN to your center time

YEAR LONG GROWING BUNDLE OF CENTERS FOR
KINDERGARTEN, FIRST GRADE AND SECOND GRADE.

KINDERGARTEN
